

# Vege Tree's feature

"Vege Tree" is a vertical cultivation method that grows vegetables while rotating.

- ❑ We create spatial designs through plant cultivation that allow for the enjoyment of three aspects: viewing, nurturing, and eating.
- ❑ An one-of-a-kind cultivation system, friendly to both people and the environment with energy-efficient, space-saving, and water-saving design.

## Installation scenarios

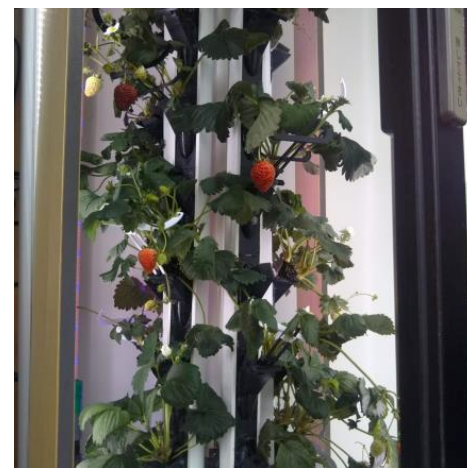

Stylish and customizable to fit various situations from restaurants and cafes to shops.  
\*size and design are completely customizable
